

I am commenting on the possibility of the removal of FM translators. I listen to radio that uses these FM translators and feel it is a disservice to me as a citizen to require preference of LPFM stations over FM translators. I feel there is no reason that these two types of stations cannot live in equality and harmony. If the local FM translator service were to be replaced by LPFM, my radio station preferences would be greatly hampered as the translator service I currently listen to has no equivalent in the LPFM region. I believe that it serves the public interest to maintain translator service as is.
